RoHS Declaration of Compliance

This is to certify that all standard products manufactured by Fair-Rite Products Corp. listed in Catalog 14 Rev 2-3/2001 are RoHS compliant as of 3/1/2005, and meet the requirements of the current RoHS Directive 2002/95/EC.

New manufacturing lots of parts are being shipped and added to inventories. New labels indicating RoHS compliant status are being included. The RoHS status will also appear on new acknowledgements and invoices.

Fair-Rite's core business is the manufacture of soft ferrite components. Soft ferrite's composition is of metal oxides. The "ferrite only" components that Fair-Rite Products Corp. supplies have always been RoHS Compliant. All ferrite cores manufactured by Fair-Rite Corp. have a Moisture Sensitivity Level of 1.

Fair-Rite Products Corp. supplies all standard parts as RoHS compliant. The termination wire used on board level parts has a 100% matte tin plating with a nickel barrier and is Pb Free. All multi-layer cores are terminated with a RoHS Compliant tin/silver/copper plating. Both of these plating types are forward and backwards compatible with standard soldering processes. Fair-Rite cable bead assemblies that use a plastic case do not use PBBs or PBDEs for fire deterrent and are RoHS Compliant.
